IMPULSION TITANIUM GREEN

IMPULSION TITANIUM GREEN

Les Ateliers Louis Moinet will be unveiling an exclusive creation at the seventh edition of the Dubai Watch Week, which will take place from 19 to 23 November 2025 at Dubai Mall – Burj Park. The IMPULSION TITANIUM GREEN chronograph features an exposed mechanism combined with the magic of a flying tourbillon, adorned for the occasion in green and red.

A special edition for Dubai Watch Week

The IMPULSION TITANIUM GREEN, which was conceived especially for this event, reveals a very rare aesthetic, fusing mechanical virtuosity with chromatic energy. Green dominates first on the chapter ring, where the minute track is punctuated with red at every fifth marker, then extends to the alligator leather strap, enhanced by fine scarlet topstitching. These red accents appear throughout the timepiece as very fine details: on the chronograph seconds hand, on the counter hands, and on the indicator atop the tourbillon cage.

The mainplate is covered in layer of carbon fibre that extends behind the tourbillon cage and accentuates the surrounding inserts. This lends the entire composition a decidedly technical character. It interacts with the depth of the smoked sapphire counters and the lustre of titanium. The complex interplay of materials and contrasts highlights the movement's three-dimensional architecture. At the heart of this design are the chronograph mechanism and gear train, boldly displayed and delivering a captivating mechanical performance.

With the IMPULSION TITANIUM GREEN, Louis Moinet unveils an exclusive edition for the season's prime watchmaking event, reaffirming its promise to deliver a true « show on your wrist ».

An exceptional calibre

The IMPULSION honours the founding fathers of modern watchmaking, Abraham-Louis Breguet and Louis Moinet, inventors of the tourbillon and chronograph respectively. It brilliantly unites the fully visible chronograph mechanism with the magic of a flying tourbillon.

This IMPULSION timepiece is powered by an in-house calibre, specially designed and assembled by Louis Moinet watchmakers in their workshops in Les Breuleux.

At the heart of the chronograph, the column wheel precisely orchestrates the start, stop and reset functions, controlled by a single pushbutton. This mechanical ballet is complemented by the aerial dance of the flying tourbillon, whose off-centre cage completes one revolution per minute.

Powering the whole is a manually wound movement with a double barrel that can provide a generous 96 hours of power reserve.

A sculptural case

With a diameter of 42.5 mm, the IMPULSION case immediately broadcasts its bold character. The sculpted silhouette, crisp lines, and openworked areas make for a decidedly dynamic presence. Its overall composition suggests a work of art that is both technically and aesthetically exciting.

Its ingeniously assembled case comprises four distinct components: two lateral sections, a caseback and a bezel, all crafted in grade 5 titanium. This material is a perfect combination of lightness and strength and ensures exceptional wearing comfort. Cutouts on the flanks reveal the inner frame, which is in black-tinted titanium.

The various surfaces alternate polished, satin-brushed and micro-bead-blasted finishes, creating striking plays of light and contrasts that reveal the full power of its design.

TECHNICAL SPECIFICATIONS

WATCH

MODEL

IMPULSION TITANIUM GREEN
Limited edition of 12 watches

CASE

MATERIAL

Polished and satin-brushed grade 5 titanium | Sapphire crystal with double-sided anti-reflective treatment

DIAMETER | HEIGHT

42.5 mm | 14.75 mm

WATER RESISTANCE

30 meters

DIAL & HANDS

COUNTERS

Smoked sapphire

HANDS

Hours and minutes: Facetted and skeletonised, with luminescent matter
Chronograph seconds and counter hands with red tips

MOVEMENT - LM114

FUNCTIONS

Hours | minutes | small seconds | chronograph with 30-minute counter

COMPLICATION

Column-wheel monopusher chronograph
Flying tourbillon with off-centre cage

DIAMETER | HEIGHT

32 mm | 7.55 mm

TYPE

Hand-wound mechanical, double barrel

OSCILLATIONS

28,800 vibrations per hour

JEWELS

36

POWER RESERVE

96 hours

STRAP

MATERIAL

Green Louisiana alligator leather | Red stitching | Alligator lining | Preformed wristband

CLASP

Triple-blade folding clasp | Fine adjustment | Curved "Fleur de Lys"
